

Sarah M. Kim, PMP

Results-Driven Leader Dedicated to Optimizing Project & Program Operations

Bellevue, WA 98006 | 425-395-9875 | ss4rah@gmail.com

Profile of Qualifications

- Strategic and PMP-certified Project Management leader with 10+ years of experience in both Agile and Waterfall methodologies.
- Consistently delivers impactful, data-driven outcomes by guiding multi-million-dollar projects (\$500K-\$1.5M) and enhancing operational efficiency within complex enterprise settings.
- Adept at building strong relationships, coordinating vendors, and leading diverse teams to achieve project goals across all phases.
- Bilingual: English and Korean.
- Expertise includes MS Project, Azure DevOps, M365, MS SQL, and SharePoint.

Professional Experience

BOEING – RENTON, WA

NOV 2023 – JAN 2025

PROJECT MANAGEMENT SPECIALIST

- Contributed to the development of a unified inventory management system for standard fasteners, enabling Just-in-Time (JIT) replenishment services for designated operational areas and improving supply efficiency to Area 3, Area 9/9QT, Area 9ST, and Area 5 (Dolly Castor) located in Renton.
- Served as a key member of the Renton MOS&L PMO team, supporting the delivery and oversight of both capital and non-capital projects across the organization.
- Managed a major capital investment for the NBF Jack Tester project valued at \$1.7M, presenting the business case to Executive Leadership, securing approval, and leading the development of the Phase 1 project plan in partnership with Engineering.
- Led the planning and execution of the NBF Jack Tester project in collaboration with Finance, overseeing cost management, scheduling, risk register development, and the documentation and facilitation of internal RBPI processes.
- Partnered with team members to design and implement a centralized OneNote documentation hub, improving organization of team schedules, onboarding materials, and project management processes.
- Oversaw the Pedestrian Train Crossing project in coordination with EHS, GREF, and Facilities driving initiatives focused on enhancing pedestrian safety during train operations.

BEYONDSOFT (MICROSOFT) – BELLEVUE, WA

MAR 2022 – SEPT 2022

BUSINESS PROGRAM MANAGER

- Strategically coordinated, planned, and managed FY23 planning activities across CSU workstreams, including workstream kick-offs, weekly working sessions, business evaluations, and solution-support initiatives.
- Led planning and strategy efforts by overseeing the development and management of RoEx's supplemental deliverables, producing key supplemental materials such as the FY23 Impact Guide, External CSU Overview Guide, and Career Options Guide for individual contributors and managers.
- Prioritized and managed daily operational workflows, including overseeing the rhythm of business (ROB), facilitating working sessions, and leading weekly team meetings—serving as a primary representative and advocate for the Role Excellence team.
- Maintain continuous communication with workstream owners, Solution Area (SA) partners, Field teams, and HR stakeholders to align CSU timelines, requirements, and expectations for the Role Success Guide deliverables.
- Developed and managed all presentation and documentation materials for the Role Excellence team, including PowerPoint decks, Excel models, and Word-based walkthroughs.
- Drove strong engagement with the launch of the Impact Guide, securing 2,320 total views (766 unique) within the first two weeks on the CES Hub.

BEYONDSOFT (MICROSOFT) – BELLEVUE, WA OCT 2019 – JUL 2021

BUSINESS PROGRAM MANAGER

- Played an integral role as a member of the CompassOne team within the MS Services organization, owning key workstreams and coordinating run-state projects to ensure consistent operational execution.
- Ensured all project activities adhered to established guidelines and standards outlined in the SBO Repository, maintaining compliance and operational consistency across initiatives.
- Prioritized and managed daily workflow, including overseeing the rhythm of business (ROB), facilitating working sessions, and leading weekly team meetings to drive on-time, on-budget, and high-quality launch outcomes.
- Coordinated, planned, and managed the migration from DocuSign to Adobe Sign E-Signature platform (Lift & Shift capability), overseeing requirements definition, operational planning, change management, and financial support.
- Developed and maintained the E-Signature SharePoint site for CompassOne, improving accessibility and organization of project documentation and resources.
- Led user acceptance testing (UAT) across select teams, ensuring readiness, quality, and alignment with business needs.
- Provided administrative and operational support for the Compass tool by managing data points, performing data analysis, and creating SQL and Excel queries to support informed decision-making.
- Collaborated closely with stakeholders to gather business requirements, conduct in-depth analysis, and establish priorities that enabled the on-time launch of two major content releases within 18 months, spanning 43 languages and 72 templates.

MURPHY & ASSOCIATES (MICROSOFT) – BELLEVUE, WA

FEB 2017 – SEPT 2018

PROJECT MANAGER

- Successfully executed six quarterly SOX compliance reviews for the Microsoft UST organization, ensuring adherence to internal controls and regulatory requirements.
- Conducted detailed data analyses to validate accuracy, confirm proper access, and safeguard UST assets and tools.
- Developed and implemented targeted process improvements that strengthened operational workflows and enhanced documentation quality.

VALENTE CONSULTING (MICROSOFT) – BELLEVUE, WA

SEPT 2009 – JUL 2014

LOCALIZATION PROGRAM MANAGER

- Managed multiple concurrent projects and led end-to-end localization efforts for World-Wide Volume Licensing and SBD.
- Conducted comprehensive localization project analyses and collaborated closely with internal customers, external vendors, cross-functional stakeholders, and legal counsel to ensure accuracy, compliance, and alignment with business requirements.
- Oversaw localization success metrics, budget tracking, invoicing, terminology management, and language quality processes while proactively identifying and mitigating localization risks.
- Successfully delivered the localization of the Enterprise Work Order across 43 languages, managing a final budget of \$750,000 and ensuring continuous updates and alignment throughout the project lifecycle.
